Belbeis Sharqia

Front-End Developer and final-year Mathematics & Computer Science student with hands-on experience building responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap. Currently enrolled in the MEAN Stack Web Development training program at the National Telecommunication Institute (NTI), gaining practical experience in modern full-stack development technologies including MongoDB, Express.js, Angular, and Node.js. Possess strong analytical and problem-solving skills with a growing interest in Cybersecurity, particularly in understanding web application security and secure development practices.

Experience

Bachelor's Degree Mathematics and Computer Science at Science of Zagazig University , Zagazig Sharqia

August 2022 - Present

Grade: 3.5

Studied core computer science subjects including Algorithms, Operating Systems, Computer Networks, Artificial Intelligence, Image Processing, and Computer Graphics.

Strong foundation in mathematics, analytical thinking, and computational problem solving.

Academic coursework also covered Topology, Differential Equations, Numerical Analysis, and Functional Analysis.

Developed programming and technical problem-solving skills through practical and theoretical coursework.

- Python & Generative AI Learner at ITI, onLine

February 2026 - February 2026

Grade: 100%

the NVIDIA DLI Summer Training Program: Generative AI (Beginner Level) at the Information Technology Institute (ITI), with a total of 35 training hours.

During the program, I gained practical knowledge in several key areas of Generative AI and LLM development, including: Python Fundamentals. AI for All: From Basics to GenAI Practice. Generative AI Explained. Building LLM Applications With Prompt Engineering. Augmenting LLMs Using Retrieval-Augmented Generation (RAG).

Projects **DentalGuard AI**

DentalGuard AI: Dental Image Analysis & Recognition Using AI & OpenCV • [↗](#)

Developed an intelligent medical platform that analyzes dental X-ray images using Deep Learning and Computer Vision techniques to detect cavities, fractures, and infections.

Designed a system that enables dental professionals to upload X-ray scans and receive automated diagnostic insights with high accuracy.

Implemented a secure architecture to protect sensitive medical images and patient records.

Focused on combining Artificial Intelligence with healthcare technology to improve diagnostic efficiency and support clinical decision-making.
